

Neu Ca Plus ; is a liquid foliar calcium fertilizer with manganese and zinc for the control of physiological leaf spots, premature leaf fall and bitter pit in apples, as well as for combating blossom-end rot in tomatoes, other fruit and vegetable crops, physiologic leaf rot in leaf vegetables and for improving the quality of vegetables and fruits.

It is a special Calcium based fertilizer which aims at allowing the plant to take and absorb the necessary nutritional micro elements, helping and relaxing the plants' roots and creating new roots and root branches.

Liquid foliar calcium fertilizer with trace elements (manganese and zinc) to improve the quality of fruit and vegetable crops.

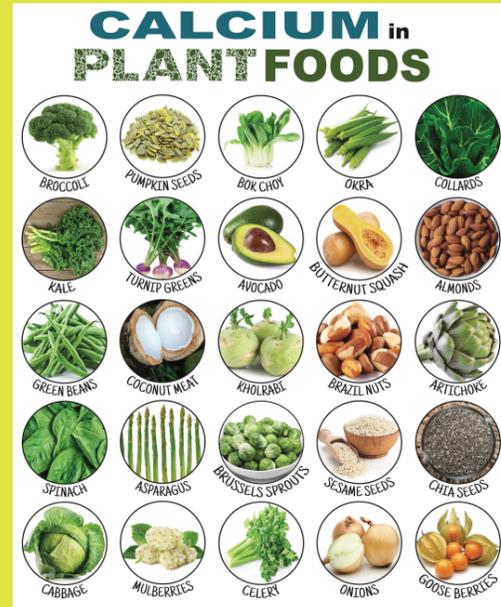

Prevents leaf spots and premature leaf fall in apple cultivation, prevents especially bitter pit  
Reduces skin and flesh browning.

Better storage and transport capability, improves the fruit quality, especially for sensitive crops like strawberries or cherries.

\*It acts in water-soil-plant avoiding plasmolysis of root cell, to move anions toxic saline, minimizing harmful effects.

\*It provides easy circulation of air and water in soil.

\*It avoids formation of scab and crack in saline soil.

#### STORAGE;

Protect stored fertilizer from frost, light, and moisture.

Store loose goods inside a building and not in outdoor areas. Keep doors closed and cover heaped materials.

As the product has a tendency to attract moisture, protect it from rain and standing water.

Take note of the hazardous material labels on the product where appropriate.

Please check the label or safety data sheet for the appropriate transport conditions and storage temperatures.

Storage temperature ; Avoid frost and excessively high temperatures.

Avoid large temperature fluctuations during storage.
